

Craft for Federal Government

Accelerate Due Diligence and
Supplier Evaluations at Scale

Get started

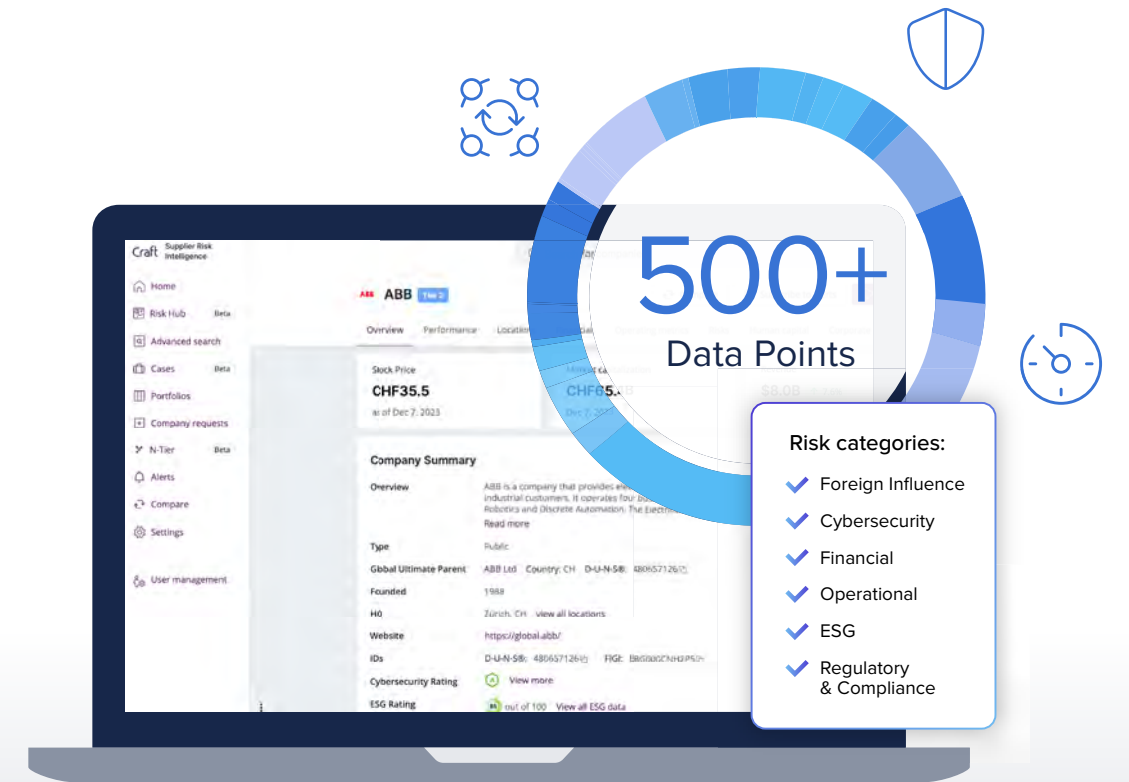

The Craft Platform, also known as CRAIG
(Commercial Research Analysis Information
Gateway) is used by over **23 organizations** in
the Department of Defense.

Simplify large-scale Due Diligence

Complete supplier evaluations in hours instead of weeks

Craft's Supplier Intelligence for Due Diligence simplifies and streamlines how government organizations conduct large-scale due diligence and supplier evaluations. This single, unified platform brings together extensive, real-time profiles of both public and private companies, providing a 360-degree view of company health and potential risks.

Save time
with easier, faster
supplier evaluations

Protect yourself
from suppliers who are
financially unstable or
have foreign influence

Ensure compliance
through centralized
tracking and
documentation

Prevent delays
and reduce reliance
on risky, single-source
suppliers

Make smarter supplier decisions with Supplier Intelligence for Due Diligence

Centralize your supplier decisions in one platform with a comprehensive view of your supplier network across all risk domains, powered by reliable, third party verified data.

Holistic Visibility

From siloed and incomplete supplier data to → a centralized 360-degree view, including third-party, multi-tier, internal spend data, and contextual insights

Superior Data Fabric

From unreliable, incomplete supplier data → to 1,300 third-party data streams validated across all risk domains, including specialized niche data

Faster, Aligned Supplier Decisions

Transition from slow, manual evaluations → to fast and easy assessments and seamless collaboration in just a few clicks

Craft

Reduce the impact of potential disruption with **Supplier Risk Management**

Utilize configurable event monitoring and relevant, timely alerts to stay informed about supplier health changes, prioritize threats, and proactively avoid disruption.

Centralized Risk Hub

From scattered risk identification → to a centralized, user-friendly view, featuring supplier health scores across 13 risk domains

Event Monitoring & Alerts

From inconsistent alerts and unreliable event monitoring → to dependable event monitoring and prioritized, timely alerts with relevant scoring, to help you focus on what's most important

Faster, Collaborative Risk Mitigation

From disjointed teams with slow manual responses → to empowered, well-informed teams with fast, trackable, cross-functional risk mitigation

Understand dependencies and impact across your supplier network with **Supply Chain Risk Management**

Gain insights into supplier dependencies to predict and mitigate risk, and optimize supply chain strategies to prevent disruptions before they happen.

Uncover multi-tier supplier dependencies

From hidden risk within your second and third-tier suppliers → to contextualized intelligence and multi-tier mapping that reveals dependencies and vulnerabilities

Improve impact assessment accuracy

From costly disruptions → to preventative risk mitigation through validated impact analysis using your operational data

Optimize supply chain strategies and collaboration

From reactive siloed teams → to cross-team alignment and collaboration, enabling optimized supply chain strategies and more efficient remediation workflows

Protect against foreign influence

Ensuring national security and economic competitiveness is paramount for the US Government and its private sector partners. Reliable supplier intelligence is crucial for identifying companies potentially influenced by adversarial nations.

“We immediately improved visibility and monitoring of over 30,000 suppliers.”

– Department of Defense - OCEA

Comprehensive risk data from best-in class data partners delivered in a **single platform**

Foreign affiliations, employment, education, groups, authorship

IP transfer risk, foreign influence in technology transfer (FITT) risk

Foreign ownership and investment

Financial risk, viability, credit rating and fraud risk

The Craft Platform

Centralized and comprehensive company intelligence

Over 500 data points on easily digestible, dedicated company profiles.

Gain insights into foreign ownership and associations, including: patents, licensing, board seats, politically exposed people, investor locations, blacklists, ultimate beneficial ownership (UBO), and more.

Conduct due diligence checks in days – not weeks

Automated portfolio checks make it easy to organize companies into dedicated groups and scan for benchmark violations or red flags across a variety of filters and criteria.

Easy-to-learn, easy-to-use

Quickly and easily understand which companies are in violation and conduct a deeper dive to understand specific and historical risks - all in the Craft platform.

Google-like searchability makes it easy to find, navigate, and understand company profiles.

Dedicated training and on-demand tutorials ensure users onboard quickly in days.

The Craft Platform

The alerts you want, right when you need them

Easily monitor changes in risk status with curated, customizable news-based notifications extracted from over 200k sources, and delivered via Craft or email. Illuminate trends with structured alert timelines, alert filters, and dedicated alert types for contextualized and empowered decision-making.

Improve communication and collaboration internally and across agencies

Track, document, and collaborate with your team by tagging relevant stakeholders, composing notes, and uploading attachments onto company profiles. Easily download entire company profiles, including comments and notes, to print and share internally as needed.

Built-in tools for risk mitigation and case management

Craft empowers teams to quickly take action when risk is identified. Case management workflows can be used to document and track compliance and mitigation efforts, and notify stakeholders when collaboration or escalation is necessary. The platform provides a comprehensive overview of open cases including status, ownership, and impact.

Proven Solution for the US Department of Defense and OCEA

Large Scale Due Diligence Simplified

The Small Business Innovation Research (SBIR) and Small Business Technology Transfer (STTR) programs fund domestic small businesses to drive high-tech innovation, addressing specific research and development needs in the United States.

THE CHALLENGE: To mitigate national security, economic, and IP theft risks, a scalable due diligence program was needed to identify foreign influence, operational, and financial risks within businesses applying for the program.

THE SOLUTION: Craft's Supplier intelligence solution provided a single platform to help SBIR/STTR efficiently and effectively evaluate, monitor, mitigate, and document risks.

Craft is now the recommended standard for due diligence
