

## The Impact of Building Supply Chain Resilience

### Investing in a Supplier Risk Management Platform

In today's fast-paced business environment, many organizations struggle with a lack of reliable risk information on suppliers, making it hard to assess vulnerabilities and ensure business continuity.

At Craft, we understand the complexities of modern supply chain risk management. Our state-of-the-art platform is designed to help commercial and government organizations improve supply chain risk management and business continuity by:

- Conducting diligence up to 10x faster
- Increasing team productivity by as much as 100%
- Protecting against risk more effectively with early warnings to avoid disruption
- Reducing the cost of compliance

### Understand the value Craft could have for YOUR organization

With just 10 simple questions, we can help you quantify the impact of increasing your team's productivity, understand the value of enhanced risk detection for your organization, and estimate how expedited risk mitigation can improve your business continuity and reduce costs.

This streamlined, insightful assessment not only highlights immediate gains but also illustrates the long-term strategic value of Craft's supplier risk management solution, to inform decision making, drive efficiency, and build resilience.

Contact our team to schedule a business value assessment today.

### Impact delivered for Craft customers

**1000+**  
Suppliers screened at a time

More than 60 organizations in the US Government including the Department of Defense use Craft as the standard for automated due diligence on suppliers, conducting screens of a thousand suppliers at a time.

**Seven-figure**  
failure averted with early warning

A UK-based services business gained an early warning about a critical supplier experiencing financial instability and reduced its exposure ahead of what would have been a costly, seven-figure failure.

**4,000**  
Suppliers screened in 2 weeks

A multinational financial services business runs compliance and risk screens with Craft on 4000 suppliers in less than two weeks, a huge improvement over traditional methods that took four months.

**100%**  
Increase in team productivity

A pharmaceutical company standardized risk management practices across its global operating units and improved its risk posture while increasing team productivity by 100%.

**50%**  
faster supplier onboarding

A US based insurance business improved its SIG-based diligence process and accelerated new supplier on-boarding by 50% by validating supplier provided data with risk intelligence from Craft.

**Tens of thousands**  
saved annually by consolidating systems

An international transportation business streamlined its compliance and reporting for the German Supply Chain Act with Craft and eliminated the need for multiple systems saving tens of thousands of dollars annually.

## Craft's intelligent supply chain resilience platform

Craft's easy-to-use platform provides 360-degree visibility to quickly explore and evaluate supplier networks, AI-driven insights to detect and mitigate disruptions, and collaborative tools to optimize supply chain strategies. With Craft, procurement and supply chain professionals can confidently navigate regulatory environments, uphold ethics, drive business continuity, safeguard their revenue and reputation, and remain resilient in the face of unexpected disruptions.
