

Craft

Supplier Intelligence

for Government Acquisition and Procurement

Proactive Supplier Due Diligence for National Security and Compliance

Protecting national security, economic stability, and economic competitiveness is now more important than ever for the United States Government and the companies they partner with in the private sector. It is critical to have reliable supplier intelligence to proactively identify companies that may pose a risk.

Craft's platform provides a single solution to evaluate and monitor companies in real time, delivering the comprehensive insights needed to identify and mitigate potential risks.

Identify National Security Risks and Foreign Ownership Control or Influence

Craft helps you understand FOCI, exposing foreign investment, global ultimate ownership, affiliations with politically exposed people, joint ownership patents, transfer of patents to state-owned entities and more.

Improve Efficiency and Collaboration Across Agencies

Document due diligence and risk mitigation efforts to share intelligence across teams and agencies and avoid duplication of efforts.

Stay in Compliance with Federal Regulations and Trade Restrictions

Craft provides access to data on government sanctions, regulatory enforcement lists, and ESG data to help you stay in compliance with key regulations like FAR, DFARS, TAA, and more.

Conduct Due Diligence in Days Instead of Weeks

Craft's platform streamlines due diligence, allowing you to scan risk across up to 1,000 suppliers at once, saving time and resources.

Ensure Economic Stability and Protect Against Fraud

Craft provides insights into supplier financial health, mitigates fraud risks, and uncovers potential supply chain disruptions.

Craft Supplier Intelligence is a proven solution trusted by over 64 government agencies and organizations

U.S. AIR FORCE

"I was able to build my UAM (Urban Air Mobility) portfolio in less than an hour, and with previous tools it would have taken a week. I was overwhelmed by the intuitive nature, the capability, and the freedom."

- Department of Defense

Craft Supplier Intelligence Platform

Craft's easy-to-use platform is powered by the most advanced data fabric and AI-driven insights.

Know your suppliers better

Get a complete view of your suppliers with reliable intelligence across all risk domains.

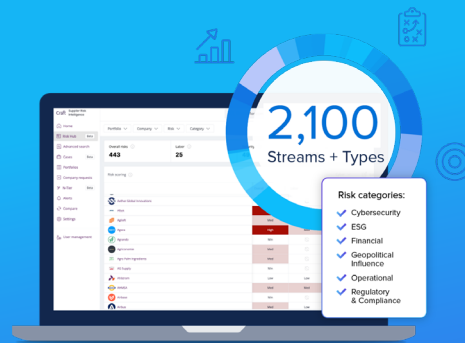

Protect against disruption

Mitigate supply chain disruption with hyper-relevant signals, tailored alerts and continuous monitoring.

Stay in compliance
