

Craft

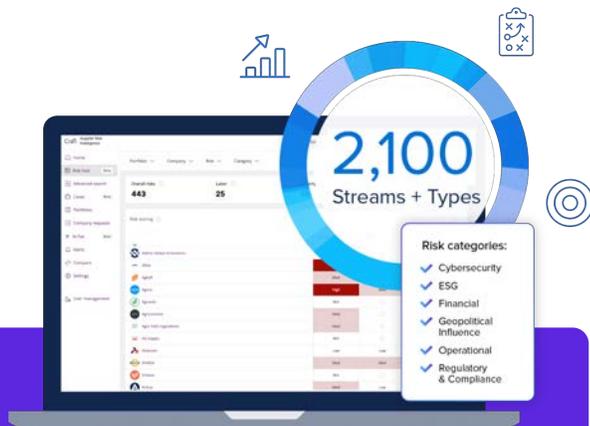

The Impact of Powerful Supplier Intelligence

In today's fast-paced business world, many organizations lack reliable supplier risk data, making it difficult to assess vulnerabilities and ensure business continuity.

Craft's platform simplifies procurement and supply chain risk management helping businesses:

- Evaluate and onboard suppliers 10x faster
- Continuously detect, investigate, and prioritize emerging risks
- Equip teams with on-demand intelligence for critical supplier decisions

Craft makes it easy to:

- Accelerate due diligence and supplier evaluations
- Simplify continuous monitoring of thousands of suppliers
- Turn supplier data into decision-quality risk signals and performance insights

Impact delivered for Craft customers

38k+
Suppliers screened

More than 35 U.S. government organizations, including the Department of War, use Craft as the standard for automated due diligence, screening thousands of suppliers at a time.

\$1M+
failure averted

An aerospace and defense business received an early warning about a critical supplier facing financial instability, allowing it to mitigate exposure and avoid a costly seven-figure failure.

4,000
Suppliers screened
in 2 weeks

A multinational financial services company conducted compliance and risk screenings on 4,000 suppliers in under two weeks using Craft—an improvement over traditional methods that took four months.

100%
Increase in team
productivity

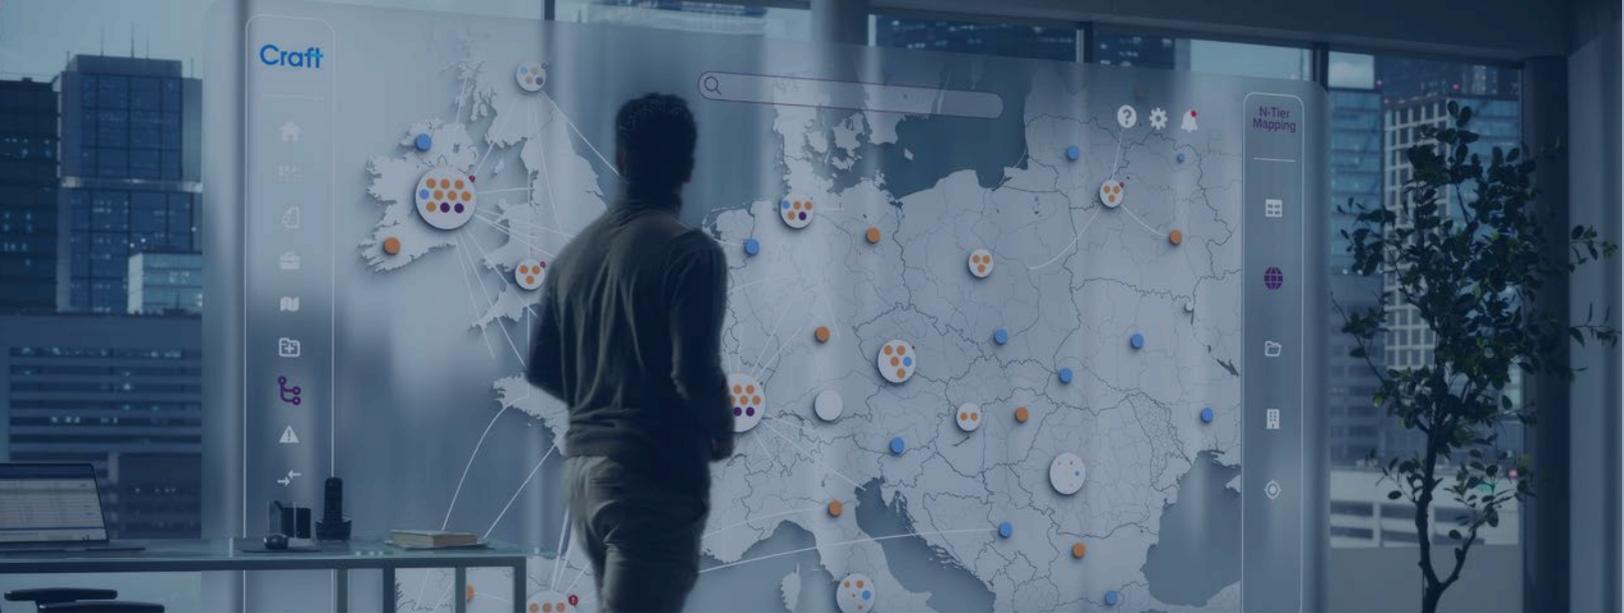

A pharmaceutical company standardized risk management practices across its global operating units and improved its risk posture while increasing team productivity by 100%.

50%
faster supplier
onboarding

A U.S. based insurance business improved its SIG-based diligence process and accelerated new supplier on-boarding by 50% by validating supplier provided data with risk intelligence from Craft.

\$100k+
saved annually

An international logistics business streamlined compliance and reporting for the German Supply Chain Act with Craft and eliminated the need for multiple systems saving thousands of dollars annually.

Craft's supplier intelligence platform

Craft's easy-to-use platform provides 360-degree visibility to quickly explore and evaluate supplier networks, AI-driven insights to detect and mitigate disruptions, and collaborative tools to optimize supply chain strategies. With Craft, procurement and supply chain professionals can confidently navigate regulatory environments, uphold ethics, drive business continuity, safeguard their revenue and reputation, and remain resilient in the face of unexpected disruptions.

Know your suppliers better

Evaluate with a comprehensive trusted picture of your supplier network

Protect against disruption faster

Anticipate and act on relevant supplier risk across multiple risk data domains

Build a resilient supply chain

Easily align and execute on supply chain risk strategies across teams

Improve due diligence with comprehensive, validated intelligence to understand supplier risk

Continuously monitor changes across your entire supplier networks with AI-powered alerts and configurable risk scoring aligned to your priorities and designed to eliminate unnecessary noise.
